Mint of the U. S. at Philadelphia
M. & R. Department

Philad^a 31. Dec. 1879

Sir,

I transmit herewith my Report on melting operations for the Month of October, 1879.

Gold was operated on but was not called for by the Coiner until November, and hence it will be reported on in the latter month.

It is quite satisfactory to observe that less than one percent of the Silver melts has been condemned.

It is much less satisfactory, to me that the ratio of wastage keeps up to about half the legal allowance, for I have striven to reduce it. It was much more unsatisfactory, until a minute revision of the whole detected errors, which appeared to have increased the wastage. After all my investigation I cannot explain why the first half of the month should average about .000-90, & the last half about .000-60

Very respectfully yours,
I. H. Booth
